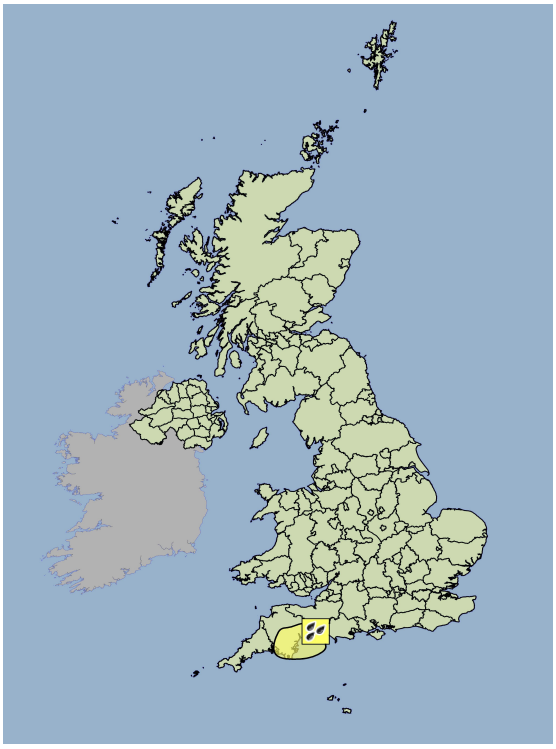
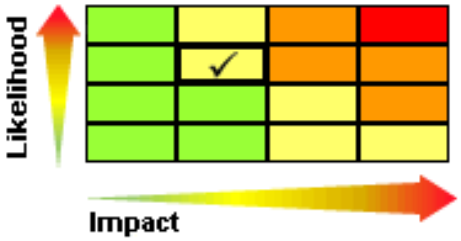
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will move east across southwest England later on Tuesday clearing east in the early hours of Wednesday. A further 10-15 mm of rain is likely with locally 20-25 mm possible on south-facing upslopes. With the ground remaining saturated only relatively modest amounts of further rain could cause localised flooding.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **15:00 on Tue, 21st Jan 2014** until **02:00 on Wed, 22nd Jan 2014**

Outbreaks of rain spreading slowly eastwards across southwest England on Tuesday are likely to become heavy at times later in the day before clearing away east in the early hours of Wednesday.

With the ground remaining saturated, the public should be aware of the risk of further localised flooding within the warning area. This could lead to minor disruption to transport.
